Dana,

That is purposeful, we didn't want to go into detail in the

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5 but I'm open to any new suggestions. I'll set up a meeting for us to talk later today. Additionally, attached is comments we just received from Steeger on the stewardship piece. He prefaces his comments with, "I only glanced at this, but have imbedded a few edits/comments for your consideration." Which horrifies me a bit to what types of comments he would have made had he actually thoroughly looked at the document lol.

Hi Steven,

Happy new year! Thanks for sharing the draft. The document provides a nice summary of the risk areas associated with the neonics, some of our related required mitigation, and directs readers to where they can go to our website for additional information. I did feel that much (though, not all) of the information in the draft is already captured in various sections of the PID, but noticed that while v

Subject: Neonics Stewardship Piece for EFED Review

Good afternoon,

In association with the neonicotinoid PIDs, PRD has drafted a brief memo detailing the importance of good stewardship related to neonicotinoid specific use and exposure factors. I'm including the current draft in this email for EFED review and comment. I realize this is very different from what was originally envisioned, but our goal is to, at the very least, bring attention to the importance of best management practices and good label stewardship with neonicotinoid products.

I apologize for the short turn around on this but we would need comments by January 8th if possible. Thank you for your help.
